

Installation Manual

Office 2021

For Windows

Notice: Before you begin the (re)installation of Office 2021, the following points are important:

Activate & Reinstall:

- Always install the software with a working internet connection. Going offline can cause an incorrect installation.
- Do not worry if you are not required to enter the license code. Being online often activates the code automatically.
- Install the software within one month of purchase. The download link can also be found in your Microsoft account, see page 6.
- Sign in with your own Microsoft account. This account is not under our management, so please save the email address for yourself.
- If you get the message that the code is already in use, then most likely the code has already been activated on a Microsoft account. In that case, you can follow the steps from page 6.
- If you have already installed Office on your computer or if you have a trial version, please uninstall it first. The best way to do that is by using the [Easy Fix Tool](#).

Step 3: Click on the 'Download' button. Please note that the basic one-month access guarantee applies to access the download, not to use of the software itself.

Step 4: The setup will now be downloaded. When this is finished, click on the file. If you cannot find it at the bottom of the screen, go to downloads and find the file there.

OfficeSetup.exe

Step 5: Next, you will be taken to the screen where the installation is prepared. Please note that this can take some time! Do not abort the installation, but give this time.

Over enkele ogenblikken is alles gereed.

Step 6: The installation is now complete. Click 'Sluiten (Close)' on the screen below.

Step 7: Start an Office program. You can do this by going to 'Start' and typing 'Word'. Click on the program and open it. Click on 'Aanmelden (Sign in)' in the top right corner.

Step 8: Sign in with your own Microsoft account.

Step 9: Do not worry if you are not required to enter the license code. Being online often activates the code automatically.

Office 2021 is now ready to use!

Reinstalling Office 2021 for Windows

Step 1: First, remove your current Office installation. You can do this by using the [Easy Fix Tool](#).

Als u Office wilt verwijderen, kunt u daarvoor het Configuratiescherm gebruiken. Maar als u Office volledig wilt verwijderen, moet u daarvoor het hulpprogramma voor een snelle oplossing gebruiken.

1. [Download het hulpprogramma Easy Fix.](#) ←
2. Open het hulpprogramma Easy Fix en klik op **Volgende**.
3. Klik op **Yes**. Het kan even duren voordat alle onderdelen van Office zijn verwijderd, dus schakel uw pc niet uit.
4. Wanneer het hulpprogramma klaar is, klikt u op **Volgende** en sluit u het hulpprogramma.
5. Start uw pc opnieuw op om het volledig verwijderen van Office te voltooien.

Step 2: After you have completely removed Office from your device, you should also check whether you are logged out from all Microsoft websites etc. If not, please do so.

Step 3: Next, download Office 2021 from this [download link](#).

Step 4: Install the software using the link above. After you have done this you can open e.g. Word. Right after opening the software you will see a pop-up window (unless you are logged in somewhere with a Microsoft account!) in which you are asked to log in. In this same window you also get the option not to do this, and instead enter your product code to activate the software. Choose this option, often called 'In plaats hiervan een productcode invoeren (Enter product code instead)' and enter your product code.

If you do not see a pop-up window, go to File > Account and click 'Change License'.

Step 5: Now your software should be properly activated. You can check this by clicking on 'File' within Word and selecting 'Account'. Here you can see which installation is currently active on your device and if it has been activated correctly.
